## DETAILED ACTION

### *Specification*

The definition on page 9, lines 23-29 of the specification of “reporter molecule” is noted.

### *Claim Rejections - 35 USC § 112*

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 3-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is unclear in claim 3 what is FtsZ; it is suggested that the function and source of the protein be identical.

It is unclear in claim 4, what is HFKT.

It is unclear in claims 5-7 whether the recited “reporter group” is identical to the “reporter molecule” defined on the specification.’

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-are 2 are rejected under 35 U.S.C. 102(e) as being anticipated by Shoyab *et al.* The reference provides amphoregulins. In analyzing these proteins, a set of peptides is made from the human amphiregulin precursor for use in generating amphiregulin specific immunoreagents. (see figure 6, column 4, lines 15-18, columns 20-21, lines 64-) One these peptides (SEQ ID NO:22) has the sequence VDPPQNKTESSENTSDKPKRKKKG. It comprises DKPKRK, which is a portion of SEQ ID NO:2 (aa 186-190) The immunoblot are shown in figure 7 using the peptide specific antisera against amphiregulin (which also contains SEQ ID NO:22) The immunoblots of Shoyab *et al.* are thus labeled compositions comprising a purified first protein which comprises a portion of SEQ ID NO: (DKPKRK) and a second purified protein (antibody),

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

Art Unit: 1653

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-8 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-10 of U.S. Patent No. 5948889. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims differ only in scope and one requires the purified protein of the patent to make a composition comprising that protein.. With respect to instant claim 2, it is broader than claim 4 of the patent, as the latter specifies a fusion protein.
